Transform Your Smile with Discreet, Modern Orthodontics **No Brackets, No Wires, No Compromise**

At Dentist On THE ROCK, our advanced clear aligner and digital orthodontic solutions offer a life-changing way to straighten teeth, enhance your appearance and restore confidence - all without the discomfort and inconvenience of traditional braces. Whether you're dealing with crowded teeth, gaps, bite issues or relapse after previous orthodontic treatment, our cutting-edge clear aligner systems provide a discreet, effective and comfortable path to your ideal smile.

Our Guided Smile Concept™ is a signature approach designed to offer visible results with minimal disruption. We combine the latest in digital scanning, simulation and 3D treatment planning to deliver fully personalised orthodontic care. With aligners like IDDA Aligners, we move teeth safely and predictably - no metal, no wires and no embarrassment. This revolutionary method provides instant improvements in alignment, aesthetics and self-esteem, with most treatments completed in just weeks or a few months.

Consider these questions:

- ▶ Are you unhappy with crooked, crowded or misaligned teeth?
- ▶ Have you been told that braces are your only option?
- ▶ Do you avoid smiling in photos or feel self-conscious when you speak?
- ▶ Have your teeth shifted after previous orthodontic treatment?

If your answer to any of these questions is 'yes', Dentist On THE ROCK is here to help.

Led by a multi-award-winning team and global experts in digital dentistry, our team offers unparalleled expertise in clear aligners and cosmetic orthodontics. With thousands of cases treated and a passion for cutting-edge techniques, we take on even the most complex cases and deliver life-changing results.

- ▶ A complimentary, detailed clinical consultation to clearly explain your options.
- ▶ Transparent pricing with flexible financing options tailored to suit your needs.

YOU ARE TAKING THE FIRST STEP TOWARDS A BEAUTIFUL, FUNCTIONAL SMILE THAT LASTS.

DENTIST ON THE ROCK

About Our Clinic

EXPERTS IN DIGITAL DENTISTRY WITH IMPLANTS, SMILE DESIGN & ORTHODONTICS

At Dentist On THE ROCK, we are proud leaders in advanced digital dentistry, offering world-class digitally designed treatment plans using implants, smile design, orthodontics and clear aligners. Each year, we transform hundreds of smiles - helping our patients regain confidence, comfort and functionality whether through permanent implant solutions or discreet, modern teeth straightening.

While full-jaw dental implants and smile design have long been our passion and a core area of expertise, we also bring that same precision, innovation and attention to detail to our orthodontic care. From correcting misalignment to refining aesthetics, our digital orthodontic systems offer faster, safer and more comfortable alternatives to traditional braces tailored to each patient's lifestyle and goals.

Since our foundation, Dentist On THE ROCK has continuously pushed the boundaries of what's possible in Smile Design, implant and orthodontic dentistry. Our state-of-the-art facility features an on-site digital dental laboratory and the latest in scanning, planning and 3D modelling technology ensuring every treatment, whether surgical or cosmetic, is bespoke, highly accurate and beautifully crafted.

Our multidisciplinary clinical team includes experienced dental surgeons, implant surgeons, orthodontic dentists, dental nurses and skilled lab technicians who work collaboratively to plan, design and deliver exceptional results.

Why choose Dentist On THE ROCK?

- The UK's premier, multi award winning centre exclusively dedicated to digital smile design, implants and orthodontics
- Over 15 years of specialised experience in advanced digital dentistry.
- Highly experienced and internationally renowned clinical experts and technicians.

Our Technology and Clinical Excellence

At Dentist On THE ROCK, advanced digital technology underpins every aspect of our treatments. Through strategic collaborations with global industry leaders, we ensure our practice remains at the forefront of dental innovation, continually refining techniques and improving outcomes for our patients.

Our unique **Digital Treatment Planning** approach brings together our expert clinicians, dental technicians, and clinical support teams to discuss every case thoroughly. We hold regular clinical planning meetings to ensure a collaborative approach to patient care. By integrating data-driven decision-making with specialist clinical insight, we consistently deliver outstanding and predictable results, personalised to every patient's needs.

At Dentist On THE ROCK, every patient benefits from this dedicated expertise, ensuring your smile transformation is not just impressive - it's life-changing.

What to Expect with Clear Aligners

Life-Changing Smiles – Without Brackets or Wires

Clear aligners are a breakthrough in modern orthodontics, designed for real life. Unlike traditional braces, they're virtually invisible, entirely removable and remarkably comfortable. Whether you're preparing for a big life event, working in a professional setting or simply prefer a low-profile solution, aligners let you straighten your teeth without disruption. You'll see improvements quickly and enjoy the freedom to eat, brush and live as normal while your smile transforms in the background.

Discreet Alignment and Personalised Care

Every smile we treat is unique and so is every clear aligner plan we create. At Dentist On THE ROCK, your treatment is planned by award-winning specialists using the latest digital tools to ensure total precision.

From your initial consultation to your final set of aligners, everything is carefully tailored to your dental anatomy, bite and lifestyle. We don't offer off-the-shelf aligner systems - we craft your journey with the same care, attention and personalised support we bring to all our smile transformations.

Confidence & Clarity

A straighter smile can change the way you feel every single day. Our patients often tell us they feel more confident speaking, smiling and even socialising after treatment - sometimes for the first time in years. Clear aligners don't just enhance your appearance; they also improve bite function, make cleaning easier and reduce wear on your teeth. With a beautifully aligned smile, you'll gain clarity in both your dental health and your self-image.

With Our IDDA Aligners Smile Confidently - No Compromise

Your journey begins with a digital scan - no messy impressions, no discomfort. We create a fully customised treatment plan using advanced 3D simulation, showing you exactly how your smile will transform over time. Once your bespoke aligners are ready, you'll wear each set for one to two weeks, gradually guiding your teeth into perfect alignment. Throughout your treatment, we monitor your progress and make adjustments as needed, ensuring a smooth, efficient experience from start to finish. Most cases complete in just 12–24 weeks, depending on complexity.

How Your Smile Transforms

Step by Step

What are Clear Aligners?

Clear aligners are a modern, discreet alternative to traditional braces. They consist of a series of custom-made, transparent trays that gently and gradually move your teeth into their ideal position. Each aligner is worn for about one to two weeks before progressing to the next in the series, slowly guiding your smile into perfect alignment.

How does it work?

Clear aligner treatment includes two key components:

Digital Smile Design: Using advanced 3D scans and simulations, we create a fully customised treatment plan that maps every stage of your tooth movement before you even begin.

Bespoke Aligner Trays: A series of nearly invisible aligners are fabricated just for you, each designed to apply gentle, controlled pressure to move your teeth gradually and comfortably.

This combination ensures that your treatment is safe, efficient and tailored precisely to your smile. You'll be able to remove your aligners for eating, brushing or special occasions, all while watching your smile improve week by week.

Unlike traditional fixed braces, clear aligners are removable, low-maintenance, and virtually unnoticeable - offering a more comfortable, flexible and discreet path to straighter teeth.

Why Choose Clear Aligners at Dentist On THE ROCK?

Clear aligners offer a discreet, comfortable and highly effective way to straighten teeth without the inconvenience of metal braces. Unlike traditional fixed appliances, clear aligners are fully removable, allowing you to eat, brush and live your life with freedom and confidence.

Each aligner is digitally designed and precision-crafted in our advanced in-house laboratory by expert technicians, ensuring a personalised fit and predictable results. Treatment is guided by our award-winning orthodontic team using cutting-edge digital planning, so every movement is carefully mapped for optimal efficiency and aesthetics. Beyond a straighter smile, clear aligners help improve bite function, reduce uneven wear and support long-term dental health - boosting both your appearance and overall confidence.

Clear & Transparent Pricing

At Dentist On THE ROCK, we believe in clear, upfront pricing with no hidden costs. We offer tailored solutions designed to meet individual dental needs, providing transparent pricing structures and flexible finance options for peace of mind.

Clear Aligners

Mild

(Upto 5 Aligners per Arch)

Single Arch: from £995

Both Arches: from £1,995

Moderate

(Upto 10 Aligners per Arch)

Single Arch: from £1,495

Both Arches: from £2,895

Advanced

(11+ Aligners per Arch)

Single Arch: from £1,995

Both Arches: from £3,895

Our clear aligner treatment is a discreet, comfortable way to straighten your teeth and improve your smile. Using a series of custom-made, removable aligners, your teeth are gently guided into their ideal positions with minimal disruption to your daily life. Every treatment includes all necessary records, such as digital scans, photos, and any required radiographs, along with custom retainers at the end to help keep your new smile beautifully aligned for years to come.

Fixed Braces

Metal - Under 16

Single Arch: from £2,795
Both Arches: from £3,195

Metal - Adult

Single Arch: from £3,195
Both Arches: from £3,595

Cosmetic White

Single Arch: from £3,795
Both Arches: from £4,195

Our fixed braces treatments offer effective, reliable teeth straightening for all ages. For children and teens under 16, traditional metal braces provide strong, predictable results as their smiles develop. Adults can choose classic metal braces for precise alignment or opt for cosmetic white braces, which use tooth-coloured brackets and wires for a more discreet look. Whichever you choose, all options deliver excellent control and beautiful, long-lasting results.

Finance options available

0% APR finance available up to 12 months

Plus long term finance up to 60 months

Variable APR depending on length

What's Included in Our Prices?

-  Complimentary Clinical Consultation including detailed digital intraoral scanning by our expert clinicians.
-  Advanced Orthodontic carried out in our state-of-the-art, fully regulated digital clinic.

-  Retainers, custom-made to maintain your new smile after aligner treatment is complete.
-  Customised Treatment Plans, carefully created by our specialist digital orthodontic technicians using the latest scanning and planning technology.
-  Aftercare Pack provided
-  Treatment Warranty for your aligners and retainers, for added peace of mind.

Your Journey with Dentist On THE ROCK

Step 1 Complimentary Clinical Consultation

Your journey begins with a detailed, no-obligation consultation lasting approximately 40 minutes. Our expert clinicians will discuss your dental concerns, answer any questions, and carry out a comprehensive assessment.

Using advanced digital technology, including an intraoral scans, we'll provide a detailed evaluation of your dental health, bone structure, and overall suitability for our Guided Smile Concept™ treatment.

You'll leave this appointment fully informed about your treatment options.

Step 2 Planning & Consent

After you've had time to consider your treatment options, usually around a week later, you'll return to confirm your decision and complete your consent process.

At this stage, our clinical team will answer any final questions and go through your bespoke clear aligner treatment plan in detail.

Our skilled digital technicians will then use advanced CAD/CAM technology to design your personalised series of aligners, ensuring each step of your tooth movement is planned precisely for the best possible results.

Step 3 Treatment Day: Your New Smile in a Day

On your aligner fit day, you'll be welcomed into your private, comfortable patient suite at our clinic. Our friendly team will ensure you're relaxed and ready, answering any final questions you may have.

Your clinician will carefully check the fit of each aligner and make any minor adjustments needed to ensure maximum comfort and precision. Attachments may be placed on certain teeth to help guide movement, and you'll be shown how to insert and remove your aligners properly.

Once you're happy and confident with your new aligners, you'll head home with your first sets and full instructions — ready to start your journey towards a beautifully straight smile.

Step 4 Regular Review Appointments

Every two to six weeks during your treatment, you'll return for a review appointment to assess your progress and ensure your teeth are moving as planned.

At each stage, we'll carefully check the fit and comfort of your aligners, make any necessary adjustments, and answer any questions you may have. If needed, additional scans or refinements can be arranged to keep your smile on track for the best possible result.

Step 5 Final Retainers & Completion of Your Smile Transformation

At your final appointment, we'll ensure your smile stays beautifully aligned for years to come.

Your clinician will carefully fit a discreet fixed retainer wire behind your teeth, providing continuous support to maintain your new tooth positions. You'll also receive your custom-made removable retainers, designed to be worn as advised to keep your smile stable long term.

Before you leave, we'll check the fit and comfort of your retainers, show you how to care for them, and answer any final questions — so you can smile confidently, knowing your results are protected.

Hear it straight from the Patients' mouth

★★★★★

I am a 39 year old man that had very badly crooked teeth all my life, so just over a year ago I decided to do something about it and booked in to the dentist on the rock with Jack, I was expecting a lot of pain, but I can honestly say I had zero pain, I've now got nice straight teeth, a great dentist, lovely staff , they are very helpful from the 1st day to the last, they talk you through everything, so if your worried about pain and it's keeping you away from the dentist then I promise your in great hands here, it gets five stars from me... I've even got my mum using this dentist

★★★★★

If I could give more than a 5 star review I would. I was possibly one of the most nervous patients to sit in a dentist's chair but because of the care, understanding and genuine thoughtfulness from, not just Jack, (who has been amazing throughout my two years of treatment), but also from all of the team, my dentist anxiety levels have reduced dramatically. Thank you once again everyone. Love and regards Nigel.

★★★★★

Best dentist in the North of England for sure. Jack and his team are amazing and great with anxious patients like me. Looked after me for the past 2 and half years and I will never go anywhere else.

Thanks everyone, Alysha xx

Your Complimentary Clinical Consultation

At Dentist On THE ROCK, we understand how life-changing a beautifully aligned smile can be. Our complimentary, no-obligation consultation is designed to help you fully understand your options and make an informed decision about your orthodontic treatment.

Your consultation lasts approximately 40 minutes, giving you plenty of time to discuss your smile goals and concerns with our expert clinical team. Using advanced digital diagnostics — including a detailed digital intraoral scan and photographs — we'll assess your teeth and bite in detail. You'll also see a 3D visualisation of your predicted final smile outcome, so you know exactly what to expect.

After your assessment, we'll outline your personalised treatment plan, explain the costs transparently, and discuss any available financing options — ensuring you have everything you need to move forward with total confidence

Your Complimentary Consultation Includes:

Advanced Intraoral Digital Scan

to accurately visualise your teeth and jawbone anatomy.

Comprehensive Medical and Dental History Assessment

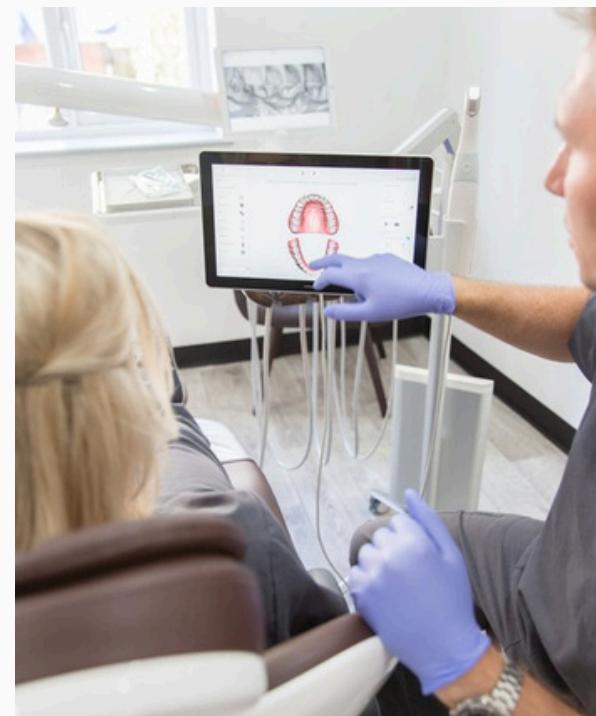

for a clear understanding of your overall health.

Bespoke Digital Treatment Planning

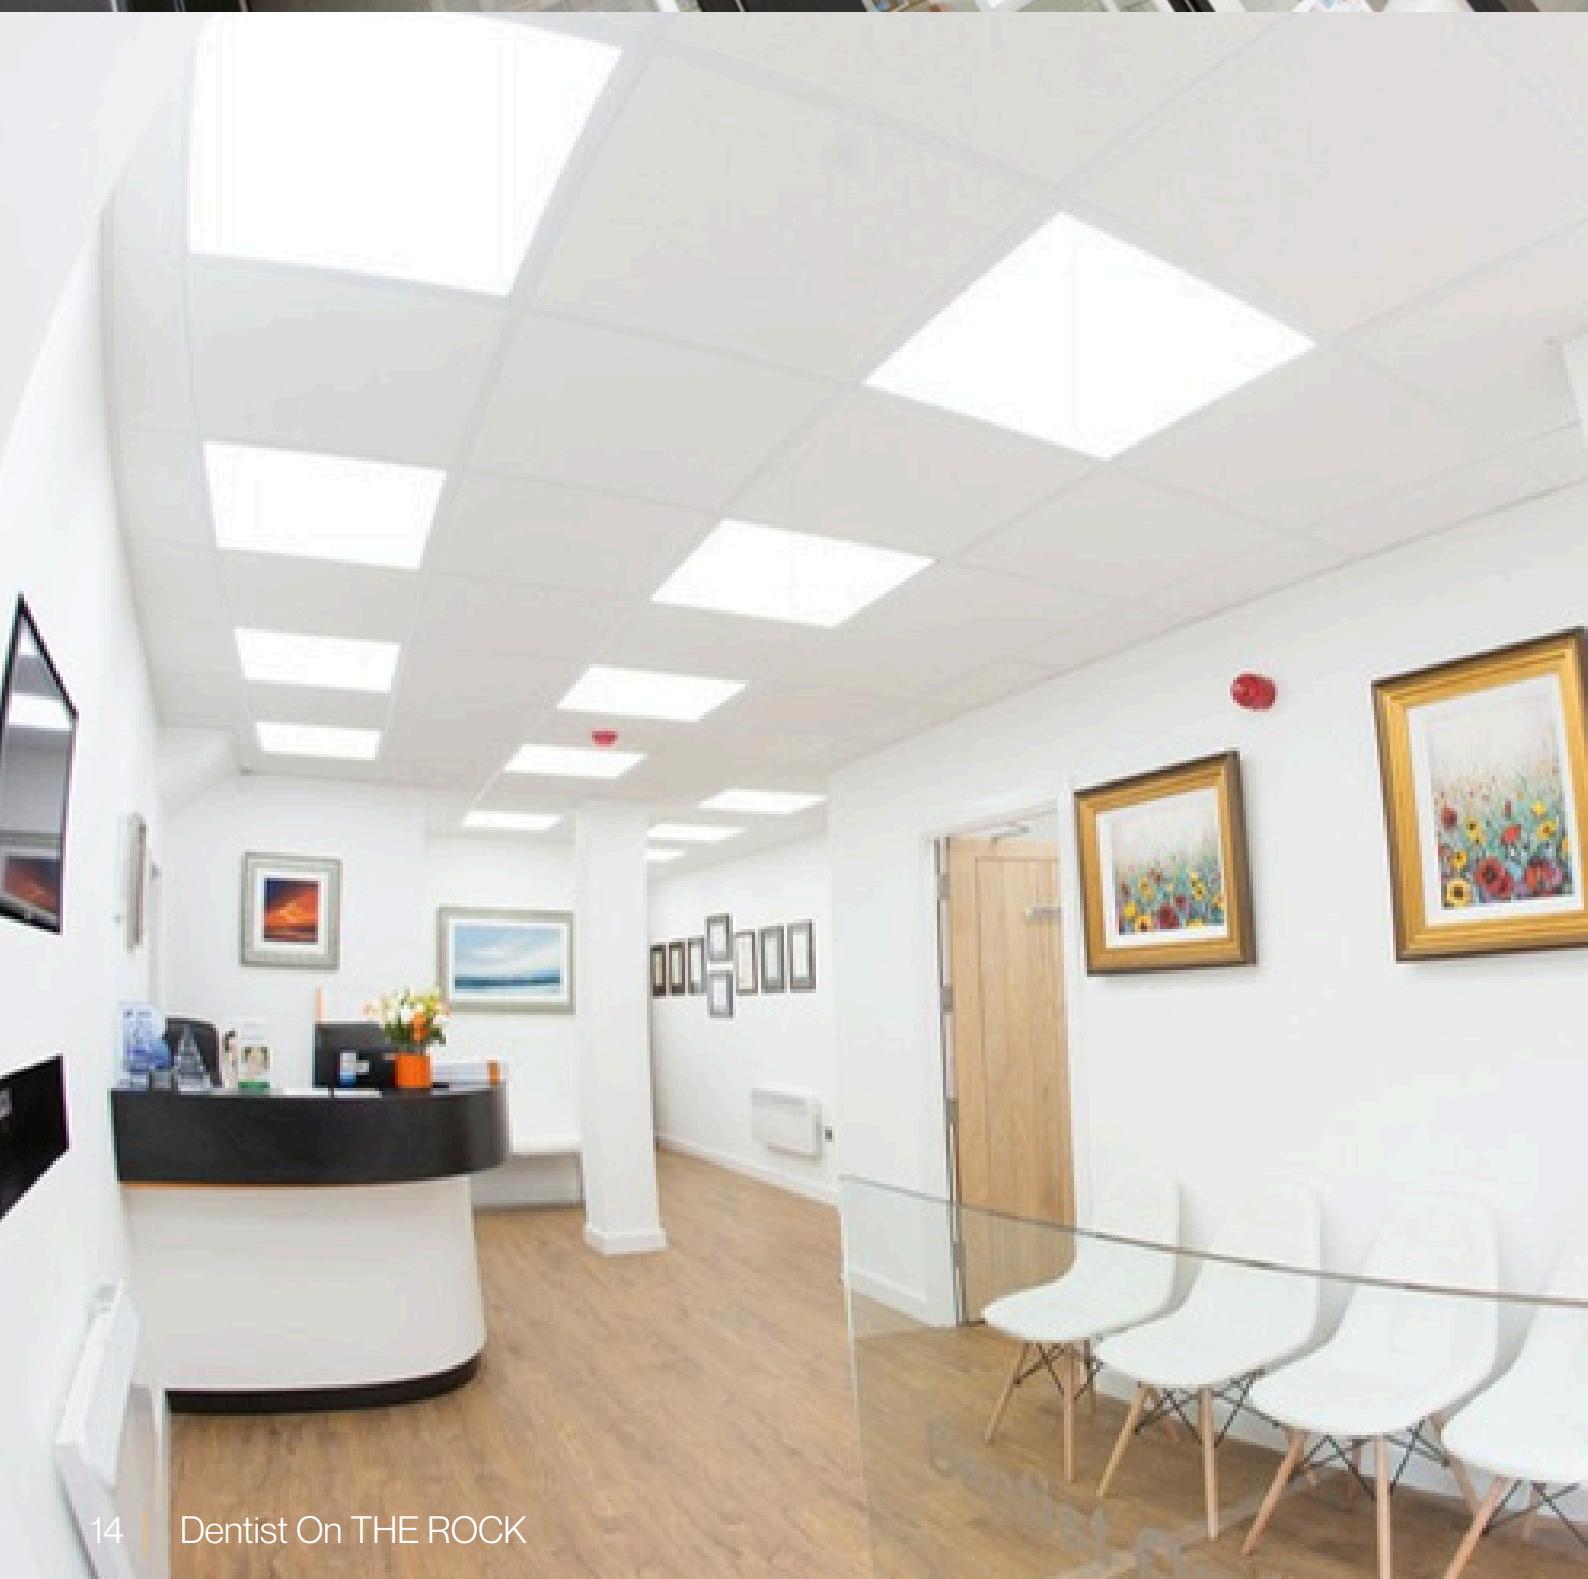

personalised specifically for our Guided Smile Concept™ using 3D Face Scanning and digital Intra-oral technology

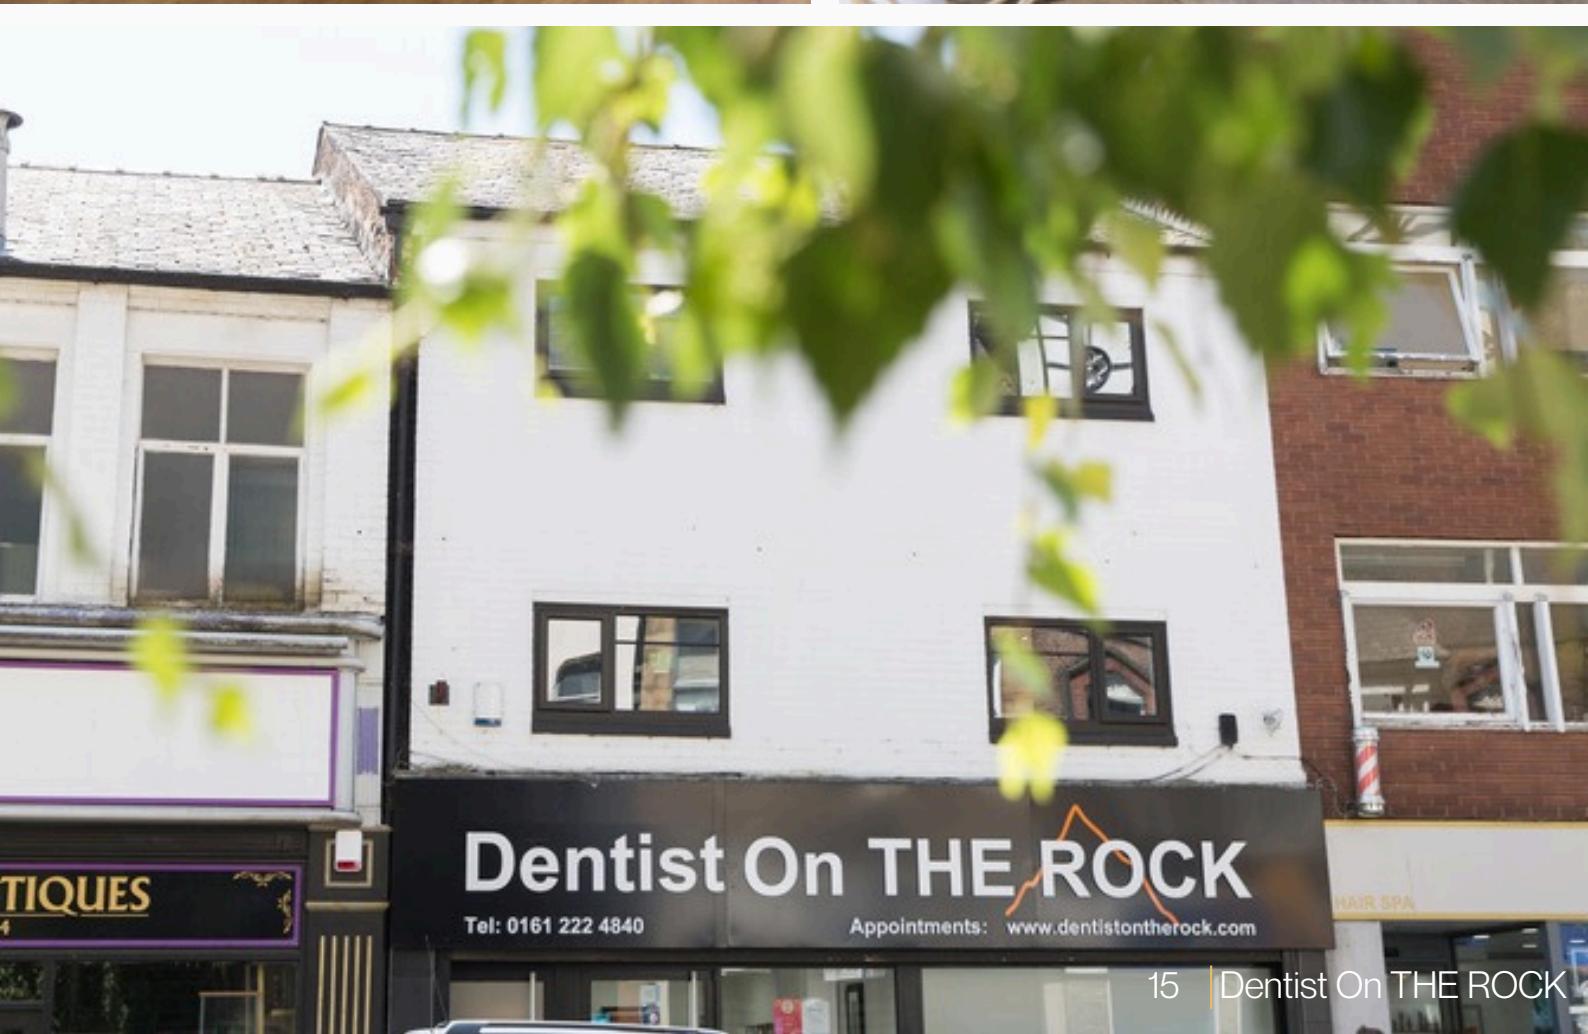

Clear Financial Guidance and Scheduling

provided by our dedicated patient care coordinator.

Consultations are subject to a deposit. In the rare event that we find dental treatment may not be suitable for your situation, we will communicate this honestly and promptly. If you do choose not to proceed your deposit will be refunded, or if you do proceed your deposit will go towards treatment costs. At Dentist On THE ROCK, your safety, comfort, and satisfaction are always paramount. Regardless of the outcome, you will leave your consultation informed and aware of the best possible path forward for your dental health.

What Sets Dentist On THE ROCK Apart?

Dentist On THE ROCK is not your ordinary dental practice. We are pioneering experts in digitally guided, same-day full-jaw dental implant treatments, Orthodontics and Smile Design, dedicated exclusively to restoring confident smiles and transforming lives through advanced digital dentistry. Our reputation as leaders in digital dentistry means dentists across the UK regularly refer their most complex and challenging cases directly to us.

Here's why patients and dentists choose Dentist On THE ROCK:

Trusted by Dentists for Complex Cases

Many dentists send their most complicated implant cases directly to our team.

Expertise and Advanced Digital Technology

Our entire practice and in-house laboratory are dedicated exclusively to implant and smile design restorations using state-of-the-art digital solutions.

Complimentary, No-obligation Consultations

We offer thorough, detailed consultations completely free of charge, providing you with clear options and informed choices without pressure.

Exceptional Aftercare

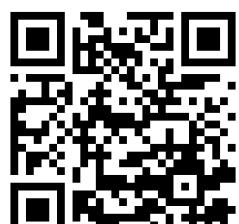

Our dedicated aftercare service supports you at every step, ensuring your comfort, health, and satisfaction from your first consultation to your lasting smile.

Start your journey towards a new smile.
