## Your Smile

---

### Transform Your Smile in Just One Day with Dental Implants

Say goodbye to missing teeth, uncomfortable dentures and failing dental work. At Dentist On THE ROCK, our advanced dental implant treatments offer a life-changing solution for restoring confidence, function and aesthetics - often in just a single day. Whether you're replacing a single tooth or multiple teeth, we use cutting-edge digital technology to deliver permanent, natural-looking results with minimal discomfort and downtime.

Our signature Guided Smile Concept™ combines state-of-the-art 3D planning, precise guided surgery and in-house craftsmanship to ensure that every implant is placed with micrometre accuracy and every crown or bridge is designed to perfectly match your face and bite. With our same-day options, you can walk in with dental concerns and leave with a strong, confident and secure smile.

### This transformative approach offers instant improvements in:

**Comfort:** Implants feel like your own teeth - no slipping, irritation or adhesives.

**Function:** Eat, speak, and smile freely with stable, secure teeth.

**Appearance:** Our restorations are crafted to look completely natural, enhancing your overall facial structure.

#### Consider these questions:

- ▶ Do you have one or more missing teeth affecting your smile or bite?
- ▶ Have you been told that dentures are your only option?
- ▶ Are your crowns, bridges, or old dental work beginning to fail?
- ▶ Have you been turned away from implant treatment elsewhere?

#### If your answer to any of these questions is 'yes', Dentist On THE ROCK is here to help.

Our expert team, led by internationally recognised implantologists and cosmetic dentists, specialises in complex implant cases, smile design and same-day solutions. With decades of combined experience, our clinicians can plan and execute even the most challenging treatments with precision and care.

Whatever your dental needs, we'll craft a tailored plan that restores your smile and your confidence.

# About Our Clinic

---

## **EXPERTS IN DIGITAL DENTISTRY WITH IMPLANTS, SMILE DESIGN & ORTHODONTICS**

At Dentist On THE ROCK, we are proud leaders in advanced digital dentistry, offering world-class digitally designed treatment plans using implants, smile design, orthodontics and clear aligners. Each year, we transform hundreds of smiles - helping our patients regain confidence, comfort and functionality whether through permanent implant solutions or discreet, modern teeth straightening.

While full-jaw dental implants and smile design have long been our passion and a core area of expertise, we also bring that same precision, innovation and attention to detail to our orthodontic care. From correcting misalignment to refining aesthetics, our digital orthodontic systems offer faster, safer and more comfortable alternatives to traditional braces tailored to each patient's lifestyle and goals.

Since our foundation, Dentist On THE ROCK has continuously pushed the boundaries of what's possible in Smile Design, implant and orthodontic dentistry. Our state-of-the-art facility features an on-site digital dental laboratory and the latest in scanning, planning and 3D modelling technology ensuring every treatment, whether surgical or cosmetic, is bespoke, highly accurate and beautifully crafted.

Our multidisciplinary clinical team includes experienced dental surgeons, implant surgeons, orthodontic dentists, dental nurses and skilled lab technicians who work collaboratively to plan, design and deliver exceptional results.

## Why choose Dentist On THE ROCK?

---

- The UK's premier, multi award winning centre exclusively dedicated to digital smile design, implants and orthodontics
- Over 15 years of specialised experience in advanced digital dentistry.
- Highly experienced and internationally renowned clinical experts and technicians.

## Our Technology and Clinical Excellence

---

At Dentist On THE ROCK, advanced digital technology underpins every aspect of our treatments. Through strategic collaborations with global industry leaders, we ensure our practice remains at the forefront of dental innovation, continually refining techniques and improving outcomes for our patients.

Our unique **Digital Treatment Planning** approach brings together our expert clinicians, dental technicians, and clinical support teams to discuss every case thoroughly. We hold regular clinical planning meetings to ensure a collaborative approach to patient care. By integrating data-driven decision-making with specialist clinical insight, we consistently deliver outstanding and predictable results, personalised to every patient's needs.

At Dentist On THE ROCK, every patient benefits from this dedicated expertise, ensuring your smile transformation is not just impressive - it's life-changing.

# What to Expect with Dental Implants

## Life-Changing Results with Advanced Digital Precision

---

At Dentist On THE ROCK, our dental implant treatments are designed to restore your smile, confidence, and quality of life with long-lasting, natural-looking results. Whether you're replacing a single missing tooth or several, our use of 3D-guided implant surgery and advanced digital planning means your implant journey is precise, efficient, and remarkably comfortable.

With our Digital Implant Smile Design™, we don't just replace teeth, we restore harmony to your smile and function to your bite, often delivering provisional or final restorations on the very same day.

## Confidence & Comfort from Day One

---

Enjoy the freedom to smile, speak and eat without fear or embarrassment. Dental implants feel and function just like natural teeth - and with our digitally guided placement, discomfort is minimised and healing is optimised. Our expert team carefully tailors each implant crown or bridge to your unique anatomy and aesthetic goals, ensuring long-term comfort and stability.

## Bespoke Design and Personalised Care

---

Every implant case at Dentist On THE ROCK begins with a comprehensive digital consultation, including high-resolution 3D scans, facial photography and smile simulation. This data is used to craft a perfectly fitted crown or bridge, produced in-house using premium materials like EMAX and zirconia.

From digital planning to final placement, your care is fully personalised - designed by our award-winning clinicians and crafted by master technicians within our digital lab..

## With Our Guided Smile Concept™, Say Goodbye to Gaps and Dentures

---

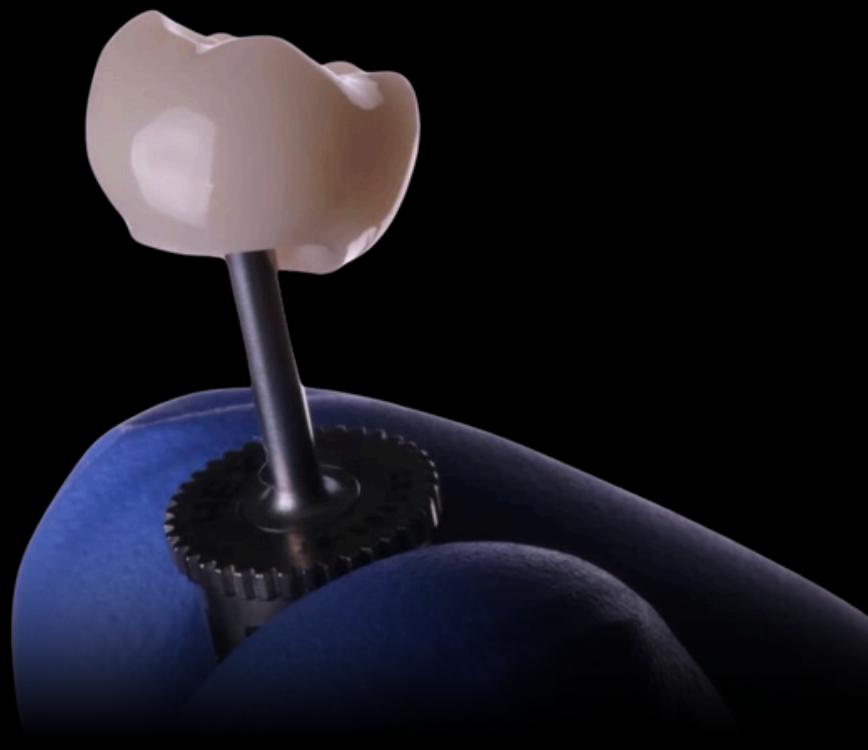

Our implant solutions offer more than just replacement teeth - they offer a transformation in lifestyle, appearance, and wellbeing. By placing implants with computer-guided precision and restoring them with high-quality, custom prosthetics, we ensure your results look beautiful and feel entirely natural.

Whether you're seeking to replace a single tooth or several with an implant-supported bridge, you can expect a seamless journey - from your first scan to your final smile. **This is implant dentistry, redefined.**

# What are Dental Implants

And what is involved?

---

## What is a Dental Implant?

Dental implants are a permanent, highly effective solution for replacing missing or failing teeth. Designed to look, feel and function just like natural teeth, implants restore both the visible tooth and its root - delivering superior comfort, stability and long-term health benefits compared to traditional bridges or removable dentures.

At Dentist On THE ROCK, our implant treatments are carefully planned using state-of-the-art digital technology, ensuring precision at every step. Whether you're replacing a single tooth, multiple teeth or supporting a bridge or denture, our digitally guided implant process delivers results that are beautiful, strong and tailored specifically to you.

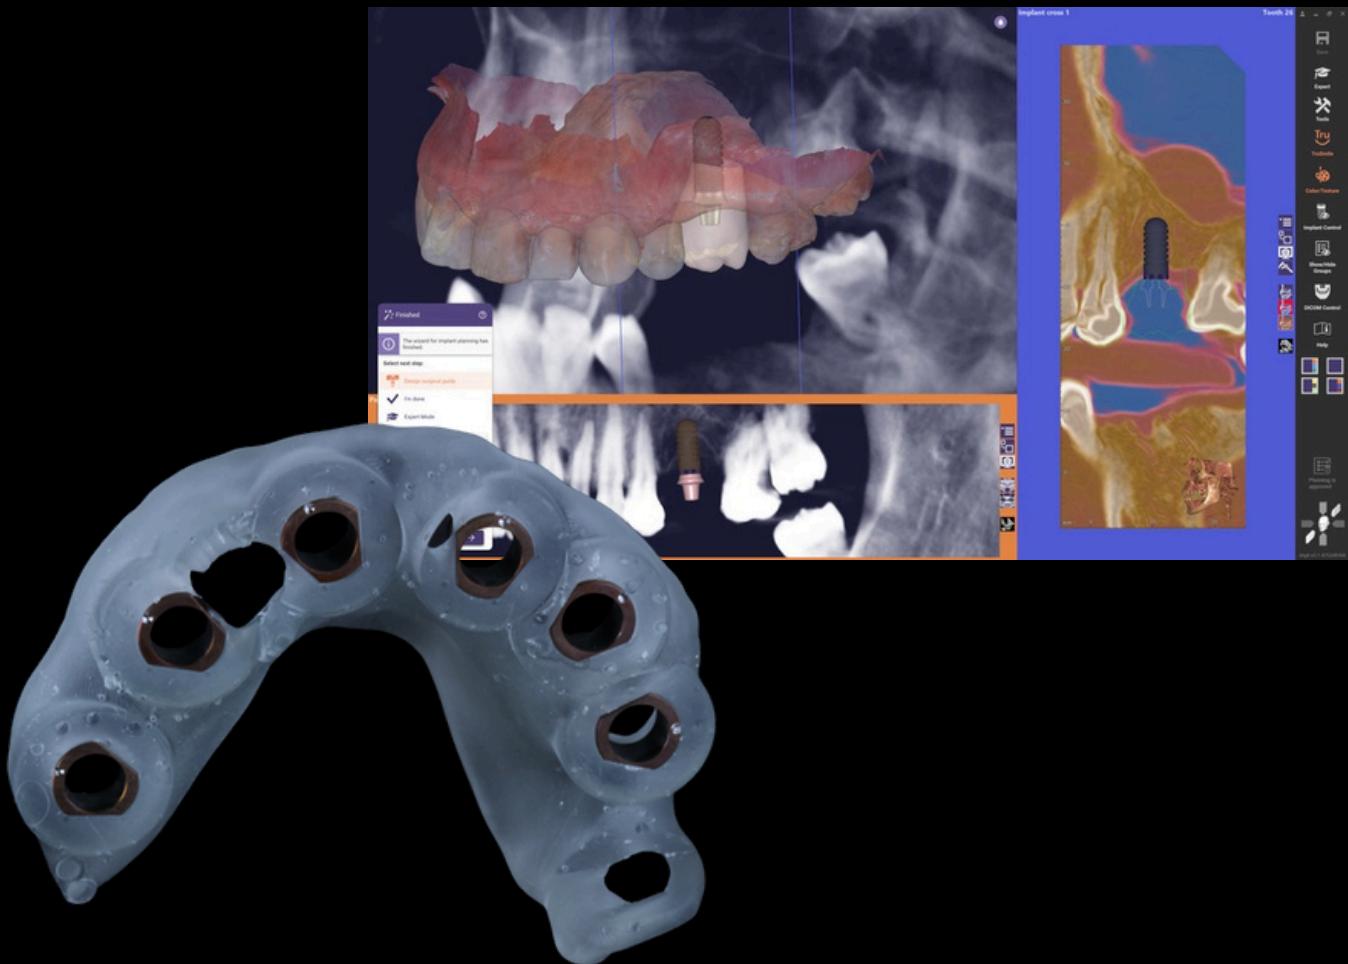

## How Do Dental Implants Work?

---

### A dental implant consists of three key components:

- **The Implant:** A small titanium or ceramic post gently placed into the jawbone. This acts as a replacement for the natural tooth root and creates a strong, stable foundation.
- **The Abutment:** A connecting piece that links the implant to the restoration above the gum line.
- **The Crown, Bridge or Denture:** A custom-made prosthetic tooth (or teeth) that fits seamlessly into your smile, crafted from lifelike, high-quality materials such as EMAX or zirconia.

# Guided Implant Surgery

## Why Choose Dental Implants at Dentist On THE ROCK?

Dental implants are the gold standard for tooth replacement - offering unmatched stability, longevity and aesthetics. Unlike traditional dentures or bridges, implants are securely anchored into the jawbone, allowing you to eat, speak and smile with complete confidence and comfort.

At Dentist On THE ROCK, every implant is digitally designed, precisely placed using 3D-guided surgery and restored with custom-crafted crowns or bridges made in our on-site laboratory. Our skilled technicians and clinicians work together to ensure a seamless fit, exceptional durability, and a natural appearance that blends perfectly with your existing teeth.

In addition to restoring function and aesthetics, dental implants help preserve your facial structure by stimulating the jawbone, preventing the bone loss that often follows tooth loss or long-term denture wear. This transformative treatment not only improves your oral health - it empowers you to live without compromise. From restoring a single tooth to supporting multiple teeth, dental implants at Dentist On THE ROCK are an investment in confidence, comfort and long-term wellbeing.

# Clear & Transparent Pricing

---

**At Dentist On THE ROCK, we believe in clear, upfront pricing with no hidden costs. We offer tailored solutions designed to meet individual dental needs, providing transparent pricing structures and flexible finance options for peace of mind.**

## Dental Implants - Single Tooth

---

**Single Tooth:** from £2,495

*Includes: CBCT, Radiologist CT Report, Surgical Guide, Implant, Abutment, Crown*

Our Single Tooth Implant solution restores function and aesthetics for patients with a missing tooth. This treatment uses one high-quality titanium implant and a custom-made crown to replace the missing tooth, providing excellent stability, natural appearance, and long-lasting strength — so you can eat, speak, and smile with confidence.

## Dental Implants - Two Implant Bridge

---

**Three to Four Teeth on Two Implants:** from £4,995

*Includes: CBCT, Surgical Guide, 2x Implants, 2x Abutments, Bridge*

Our Two-Implant Bridge solution restores strength and aesthetics for patients missing multiple teeth. This treatment uses two high-quality titanium implants to support a custom-made bridge, replacing up to three missing teeth in one area.

## Dental Implants - Three Implant Bridge

---

**Five to Six Teeth on Three Implants:** from £7,495

*Includes: CBCT, Surgical Guide, 3x Implants, 3x Abutments, Bridge*

Our Three-Implant Bridge solution replaces multiple missing teeth with a secure, natural-looking result. Three titanium implants support a custom-made bridge, restoring strength, function, and aesthetics.

## Dental Implant Retained Overdenture

---

**Two Implants and One Denture:** from £8,995

Our Two-Implant Retained Denture securely replaces missing teeth with a stable, natural-looking result, restoring strength, function, and confidence. Includes: CBCT, Surgical Guide, 2x Implants, 2x Denture Abutments & Acrylic Denture

## Extras

---

**Bone Graft (If needed):** from £510

**Soft Tissue Grafting (If needed):** £300

**Finance options available**

0% APR finance available up to 12 months

**Plus long term finance up to 60 months**

Variable APR depending on length

- ✓ Dedicated, Comprehensive Aftercare Service to support your recovery and ensure long-term success.
- ✓ Biological and Mechanical Warranties for added peace of mind.

# Your Journey with Dentist On THE ROCK

## Step 1 Complimentary Clinical Consultation

Your journey begins with a detailed, no-obligation consultation lasting approximately 40 minutes. Our expert clinicians will discuss your dental concerns, answer any questions, and carry out a comprehensive assessment.

Using advanced digital technology, including a CBCT scan and intraoral scans, we'll provide a detailed evaluation of your dental health, bone structure, and overall suitability for our Guided Smile Concept™ treatment.

You'll leave this appointment fully informed about your treatment options.

## Step 2 Planning & Consent

After you've had time to consider your treatment options, usually around a week later, you'll return to confirm your decision and complete your consent process.

At this stage, our clinical team will address any further questions you have, and your bespoke treatment plan will be discussed thoroughly.

## Step 3 Treatment Day: Your New Smile in a Day

On your treatment day, you'll be welcomed into your private, comfortable patient suite at our clinic. Our friendly team will ensure you're relaxed and ready, answering any final questions.

Under carefully managed anaesthesia to maximise your comfort, any remaining failing teeth will be gently removed, and your implants will be precisely placed. This procedure typically takes around two hours. Immediately following the surgery, you'll return home to rest.

## Step 4

### Six-Eight Week Review Appointment

Approximately 6-8 weeks after your initial treatment, you'll return for a review appointment to assess your progress and the healing of your gums and implants.

At this stage, we carefully check the fit, comfort, and aesthetics of your temporary prosthesis, and discuss any adjustments needed for your permanent restoration.

## Step 5

### Final Fitting & Completion of Your Smile Transformation

Your final, permanent dental implant crown will be meticulously crafted by our expert dental technicians and engineers, combining the latest digital dental technology and artisan hand-finishing techniques. Approximately 12-14 weeks after your initial surgery, once the implants have fully integrated and your gums have healed, you'll receive your definitive prosthesis.

This final prosthetic will offer enhanced durability, superior aesthetics, and a natural, slimmer profile specifically tailored to your facial features and dental anatomy.

You'll also receive our comprehensive aftercare package and a personalised Dentist On THE ROCK Oral Hygiene Guide, which our team will carefully explain to you.

Your beautiful new smile is now complete, designed to last and enhance your quality of life for years to come.

# Hear it straight from the Patients' mouth

Excellent care from start to finish. Rachel advised me on what would best suit me and what treatment I would need. Everything broken down into appointments. Enjoyed every step and I am now very happy with the results.  
Highly recommend Rachel at Dentist on the Rock.

If I could give more than a 5 star review I would. I was possibly one of the most nervous patients to sit in a dentist's chair but because of the care, understanding and genuine thoughtfulness from, not just Jack, ( who has been amazing throughout my two years of treatment ), but also from all of the team, my dentist anxiety levels have reduced dramatically. Thank you once again everyone. Love and regards Nigel.

The staff are lovely and can't do enough for you. They put you at ease if you are nervous and quickly get the treatment complete while doing a great job

I am a nervous patient due to bad experiences in the past from childhood but saw the reviews on the practice & also from a friend. I took the plunge & glad I did. Rachael who took on my treatment is brilliant, explained exactly what was going to happen & what she was doing throughout. I was immediately at ease as the staff are lovely. They are friendly as well as professional. The surroundings in the practice are relaxing which helps a lot. They are definitely customer focused & I felt comfortable from the start. I would recommend the practice as apart from the above I found the price of treatment reasonable for private practice, they also offer dental plans which I have taken advantage of. Should you be wary of dentists as I was, come to this practice & they will show you that no need to be . I'm confident that you won't be disappointed

# Your Complimentary Clinical Consultation

At Dentist On THE ROCK, we understand how life-changing a beautifully aligned smile can be. Our complimentary, no-obligation consultation is designed to help you fully understand your options and make an informed decision about your orthodontic treatment.

Your consultation lasts approximately 40 minutes, giving you plenty of time to discuss your smile goals and concerns with our expert clinical team. Using advanced digital diagnostics — including a detailed digital intraoral scan and photographs — we'll assess your teeth and bite in detail. You'll also see a 3D visualisation of your predicted final smile outcome, so you know exactly what to expect.

After your assessment, we'll outline your personalised treatment plan, explain the costs transparently, and discuss any available financing options — ensuring you have everything you need to move forward with total confidence

## Your Complimentary Consultation Includes:

### **Advanced Intraoral Digital Scan**

to accurately visualise your teeth and jawbone anatomy.

### **Comprehensive Medical and Dental History Assessment**

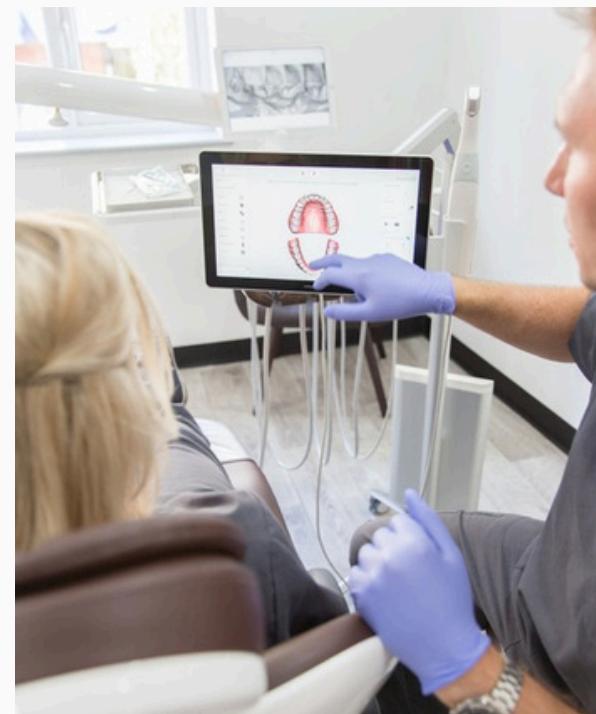

for a clear understanding of your overall health.

### **Bespoke Digital Treatment Planning**

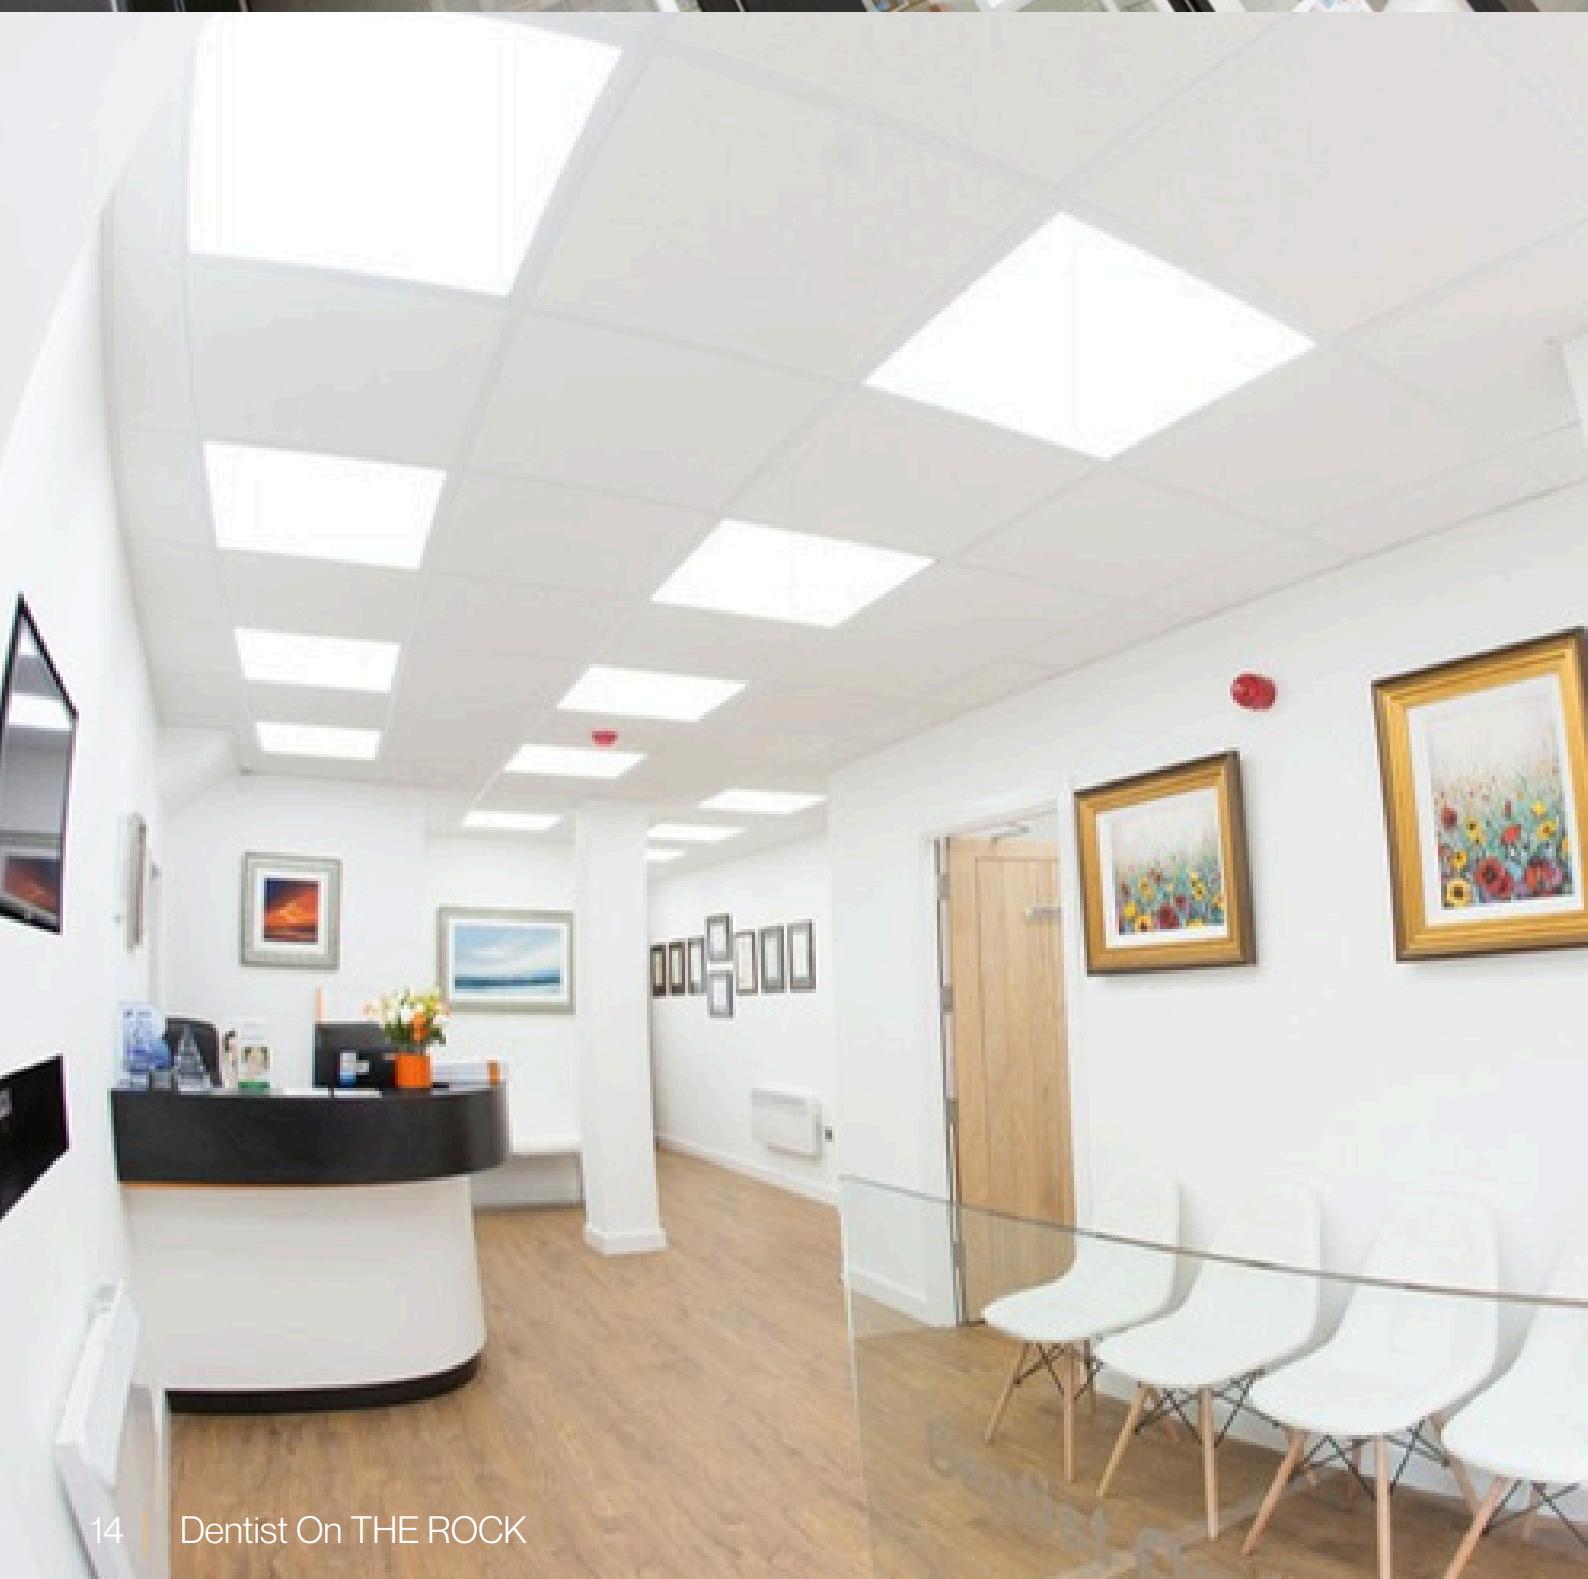

personalised specifically for our Guided Smile Concept™ using 3D Face Scanning and digital Intra-oral technology

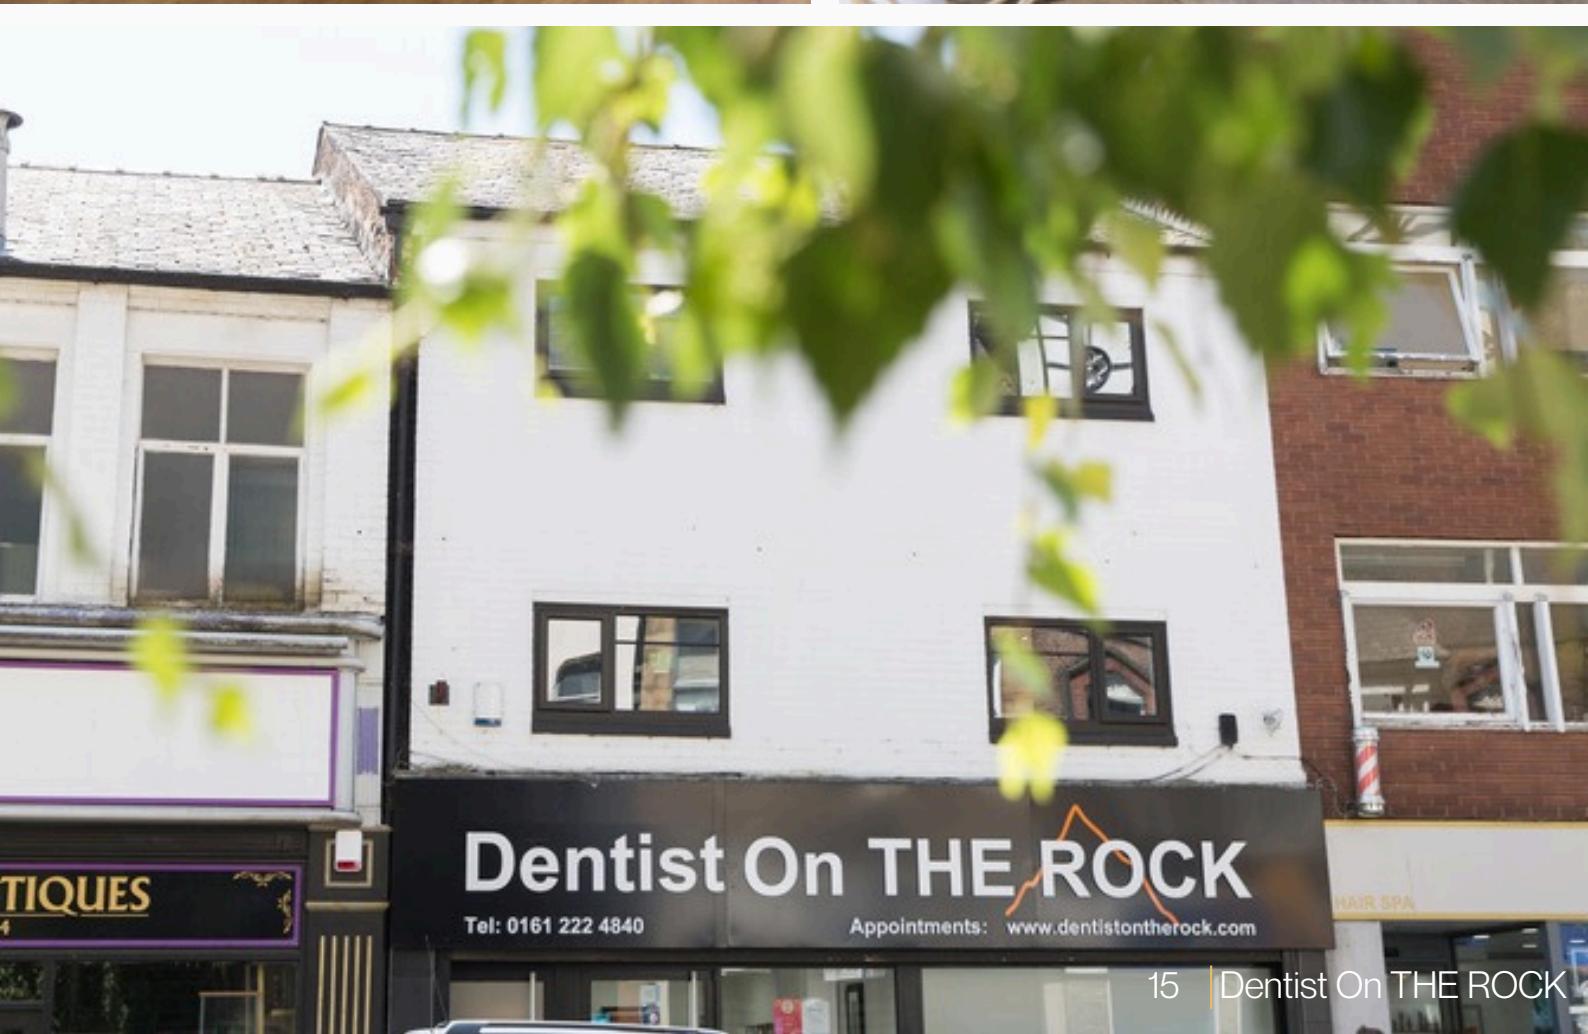

### **Clear Financial Guidance and Scheduling**

provided by our dedicated patient care coordinator.

Consultations are subject to a deposit. In the rare event that we find dental treatment may not be suitable for your situation, we will communicate this honestly and promptly. If you do choose not to proceed your deposit will be refunded, or if you do proceed your deposit will go towards treatment costs. At Dentist On THE ROCK, your safety, comfort, and satisfaction are always paramount. Regardless of the outcome, you will leave your consultation informed and aware of the best possible path forward for your dental health.

# What Sets Dentist On THE ROCK Apart?

Dentist On THE ROCK is not your ordinary dental practice. We are pioneering experts in digitally guided, same-day full-jaw dental implant treatments, Orthodontics and Smile Design, dedicated exclusively to restoring confident smiles and transforming lives through advanced digital dentistry. Our reputation as leaders in digital dentistry means dentists across the UK regularly refer their most complex and challenging cases directly to us.

## **Here's why patients and dentists choose Dentist On THE ROCK:**

### **Trusted by Dentists for Complex Cases**

Many dentists send their most complicated implant cases directly to our team.

### **Expertise and Advanced Digital Technology**

Our entire practice and in-house laboratory are dedicated exclusively to implant and smile design restorations using state-of-the-art digital solutions.

### **Complimentary, No-obligation Consultations**

We offer thorough, detailed consultations completely free of charge, providing you with clear options and informed choices without pressure.

### **Exceptional Aftercare**

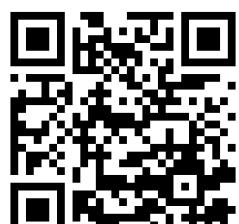

Our dedicated aftercare service supports you at every step, ensuring your comfort, health, and satisfaction from your first consultation to your lasting smile.

**Start your journey towards a new smile.**
